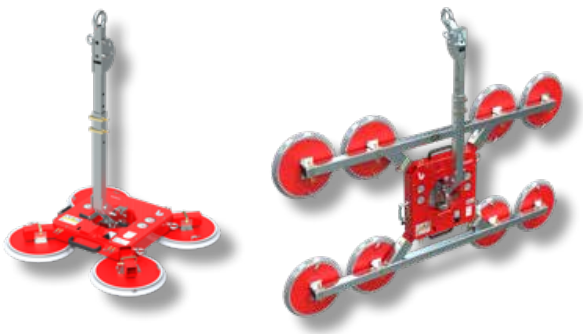
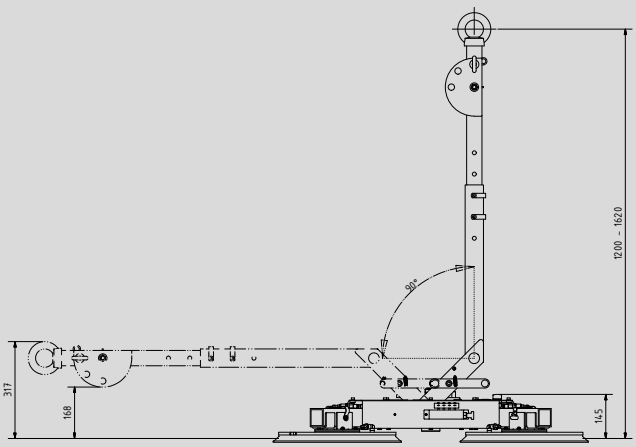
ConstructionLifter CSL Type X

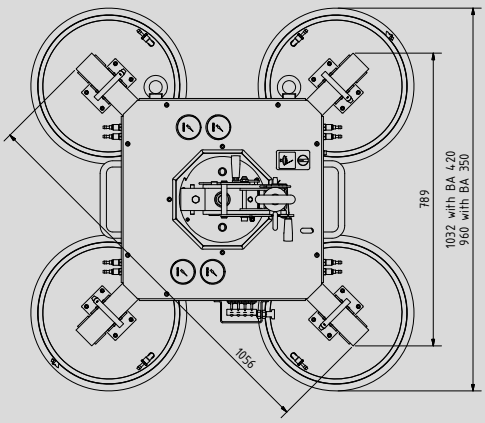
The optimum handling solution for large panels with flat surfaces.

Functions & Features

Battery lifter in lightweight construction with four-circuit vacuum system. Suitable for vertical and horizontal transport of flat glass on-site. Infinite 360° rotation range, tilting range 90° with locking mechanism in different positions. The ConstructionLifter CSL Type X is equipped with a teleskopic and removable arm. Without the suspension arm, the lifter has a very small construction size. Appropriate safety equipment is included in the basic version.



Versatile areas of application




With the extension arms, the base body can easily be modified for different applications, allowing for a versatile application with greatest simplicity and ergonomics. For further versatility we also offer CSL Type X extension arms, that can increase the maximum working load up to 1000 kg with four extra suction cups.
